25X1A MEMORANDUM FOR: Chief, Engineering Staff, OC

SUBJECT : [ ] Power Requirements for the IFD  
Signal Center, Langley

25X1A 1. Due to limitations of available power from the present  
emergency [ ] power generator, it has become necessary to split  
25X1A the electrical load in the IFD Signal Center and connect only 18.1 kw  
of the 41.2 kw total on the [ ] generator.

25X1A 2. This split load arrangement will cover only our "hottest"  
present operational circuits and while we can live with it temporarily,  
25X1A it will not suffice on a permanent basis. To alleviate the situation,  
IFD proposes to budget the sum of [ ] to procure, install and  
wire a 50 kw [ ] generator to handle the 41.2 kw equipment load  
plus lights.

3. It is requested that your organization investigate the  
problems of the installation, determine a location for the generator,  
and advise the IFD/Communications Staff of the feasibility and  
practicability plus any possible areas of conflict in the installation  
or funding estimate.

25X1A
